

## PRODUCT ENGINEER | FRONTEND SYSTEMS | DEPLOYMENT FLUENCY

Product-led interfaces, launch-ready systems, and polished frontend execution.

### PROFILE

Product engineer focused on turning early-stage ideas into clear, launch-ready software. I work across product framing, interface systems, frontend execution, browser QA, deployment setup, and presentation polish with a bias toward software that feels authored and dependable.

### STRENGTHS

Product framing, interface systems, responsive web design, browser QA, deploy and DNS coordination, and PDF collateral design.

### TOOLCHAIN

<b>Frontend</b>	HTML, CSS, JavaScript, TypeScript, React, Vite
<b>Mobile</b>	Expo, React Native, React Navigation
<b>QA</b>	Playwright browser automation and visual verification
<b>Deploy</b>	Cloudflare Pages, custom domains, DNS setup, Render cutovers
<b>Docs</b>	ReportLab PDF generation and branded resume collateral

### SELECTED WORK

#### Kineo | Product Engineer

Premium health and fitness system | Guided onboarding, dashboard, scanner, grocery, customization, payroll

- Defined route roles across onboarding, dashboard, workout flow, scanner, grocery planning, settings, profile, and premium conversion surfaces.
- Built a calmer premium system with stronger hierarchy, storytelling, and mobile-aligned product language across React, TypeScript, Expo, and React Native.

#### SimDex | Product Engineer

Signal-first market app | Live board, Dex Mode, wallet context, company surfaces, Render production deployment

- Shaped the noir product language and route architecture for a live market surface built around discovery, wallet context, and action-adjacent workflows.
- Worked with the production stack behind the app, including FastAPI services, Render deployment, domain cutover planning, and host/CORS configuration.

### OPERATIONS

- Playwright-driven UI checks for responsive layout, menu behavior, lightboxes, and sticky navigation.
- Cloudflare Pages publishing, security headers, custom-domain prep, and production deploy flow.
- Render deployment alignment, environment cutovers, domain coordination, and ReportLab-based PDF collateral.

### NOTES

No public GitHub or LinkedIn at the moment. Additional walkthroughs and implementation detail are available directly over email.
